VANISHING ANIMALS

ANDY WARHOL ♦ KURT BENIRSCHKE, M. D.

1986. 42 figures. IX, 99 pages.
Hard cover DM 59,-. ISBN 3-540-96410-X

Contents: Introduction. – California Condor. – La Plata River Dolphin. – Mouse Armadillo. – Mongolian Wild Horse. – Giant Chaco Peccary. – Okapi. – Whooping Crane. – Komodo Monitor. – Sumatra's Rhinoceros. – Douc Langur. – Bats. – Butterflies. – Sömmerring's Gazelle. – Galapagos Tortoise. – Puerto Rican Parrot. – Further Reading.

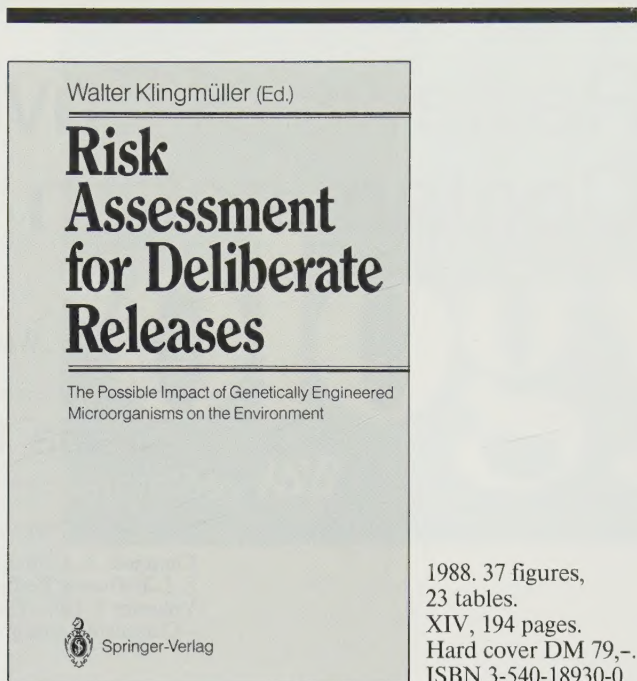

Art and science come together in this striking portrayal of some of the most endangered animals in the world. **Andy Warhol** has created largeformat full-colour plates (silkscreen over collage) especially for this book. A stimulating text by **Kurt Benirschke**, former Research Director of the San Diego Zoo, reveals the lives and habits of these animals – and the outlook for their survival.

This thorough study is an assessment of the risks involved with the deliberate release of microorganisms modified by means of genetic engineering. Major emphasis is on European cooperative research projects such as the ones on Rhizobium and Baculovirus. Further contributions cover aspects of soil microbiology, genetic transformation in soil, molecular and plasmid genetics, horizontal spread of plasmids, as well as administrative, regulative and legal aspects in relation to possible releases.
